GO NATURAL..... DIGITALLY!

www.richsmiledesign.com

What do you need to deliver extraordinary dentistry?

a) Expensive Technologies?

b) Exceptional clinical skills?

At Rich Smile Design(RSD), we assure you that with newer advances in material science and digital dentistry you can still experience the best results without investing heavy time and expenditure.

How it works?

RSD identifies the challenges dentists face in terms of motivating patient's for ideal treatment plan and executing them and address them in a phase wise manner. By using latest technology and 3d planning, RSD works on following principles.

01

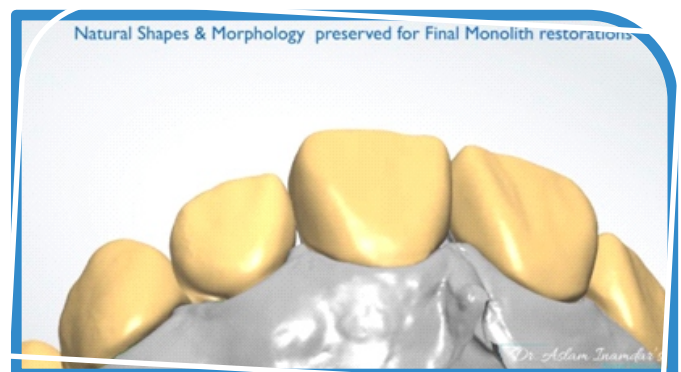

Understanding your patient's needs and allowing them to **VISUALISE THE END RESULT** with digital mock ups before actual start of treatment.

02

At the core of treatment planning is facially driven smile parameters with digital data and Natural Algorithms for final restorations giving life like appearance to the smiles you deliver.

03

Executing treatment plans seamlessly using **TEMPLATES** for achieving planned results precisely.

WHY RSD for your practice?

- 01 RSD helps you co diagnose , design and plan ideal treatments for each case based on contemporary digital dentistry workflows and innovations allowing you with ample time to efficiently execute the treatment for your patients.
- 02 Copy paste Template based dentistry provides predictability, precision and speed in your work.
- 03 Stepwise clinical guidance and laboratory support for each case by our expert team.
- 04 Patient centric treatment with digital workflows using state of the art technology, materials and innovative concepts.
- 05 RSD Education with our experts helps you gain confidence to implement digital dentistry workflows in your daily dentistry practice.
- 06 You can provide contemporary digital dentistry experience to your patients with just a simple smart phone in your hand to begin with us.

About Us

We are a team of thought leaders, clinical experts, and digital and lab experts with years of experience and respective domain expertise.

We have joined hands to spread the concept of 'copy-paste dentistry' - the new norm of today's digital dentistry era to help dentists achieve great results predictably and consistently.

Rich smile Design is an end-to-end aesthetic rehabilitation solution designed for dentists. RSD strives to help you integrate digital workflows seamlessly into your daily practice, simplify treatment planning and execution, achieve great results, and make smiles beautiful.

Team RSD believes that it's time we changed the way dentistry is practiced.

The RSD Workflow

Getting started with RSD?

Here's our '6 P GUIDE' to understand digital workflows uniquely designed to each patient's specific esthetic requirements.

Workflow Chart

01

PATIENT DATA AND DIGITISATION

Photos, videos and scans collected by the dentist are put through digital 3D planners by our expert team of doctors and digital technicians.

PREPARE THE DESIGN

Facially driven smile design prepared in 2D and 3D using Natural Algorithms keeping the end result in mind

02

03

PLAN THE TREATMENT

Create motivational & ideal treatment plans customized to each patient based on facially driven smile design. The planning and design reports are shared with you. The necessary 3D printed or milled template designs in STL format are shared which you can produce with in-house support or alternately by our digital lab and delivered to you.

PRESENTATION

Once the treatment plan is ready, present it to the patient using visual communication methods allowing them to believe what they see, This helps in driving treatment acceptance.

04

05

PERFORM

Start executing the accepted treatment plan using **TEMPLATE DENTISTRY CONCEPT** with 3D printed / 3D milled templates based on innovative copy paste dentistry workflow.

PROMOTE

Document your work to spread the word and create more referrals that drive more growth.
